

HARIPRASATH

Level Designer | Game Developer

hpofficial42@gmail.com • +44 07721 572354 • linkedin.com/in/hariprasath004 • Staffordshire, UK

PROFESSIONAL SUMMARY

Creative and passionate Level Designer with hands-on experience developing gameplay-oriented levels using Unreal Engine. Skilled in gameplay design, environment design, concept development, and game testing. Proven ability to analyse games from multiple player viewpoints, identify gameplay problems, and deliver actionable feedback. Experienced in understanding player psychology to craft unpredictable, engaging levels. Additional strengths in gameplay and narrative ideation.

EDUCATION

MSc Computer Games Design — University of Staffordshire, UK 2024 – 2026

B.Tech Computer Science — Gaming Technology — SRM Institute of Science and Technology, Chennai 2019 – 2023

Higher Secondary Certificate — La Chatelaine Junior College Completed

PROJECTS

Hard Critic | Personal Project, Unreal Engine 2026

- Designed and developed a 2.5D side-scrolling platformer inspired by classic games such as Super Mario Bros, Dangerous Dave, and Prince of Persia.
- Implemented multi-level gameplay loop: key collection, enemy avoidance, and door-based level progression.
- Focused on level pacing, difficulty curve, and player movement feel using Unreal Engine Blueprints.

Happy Ball | Personal Project, Unreal Engine 2026

- Built a physics-based top-down ball game featuring obstacle avoidance and multi-theme level design.
- Intentionally designed deceptively challenging gameplay to subvert player expectations from the cheerful aesthetic.
- Balanced movement, timing, and difficulty progression across multiple levels to sustain player engagement.

Welcome Home | Personal Project, Unreal Engine 2026

- Developed a psychological horror game driven by environmental storytelling and hidden narrative discovery.
- Designed level layout to guide player exploration naturally, revealing a dark story through scattered notes and atmosphere.
- Crafted a layered narrative culminating in a final revelation, using tension-building techniques throughout level design.

SRM VR | Team Project (3 Members), Unreal Engine 2025

- Contributed to a highly realistic VR walkthrough of the SRM Ramapuram campus.
- Responsible for 3D asset creation and environment design within the virtual campus.

DOT | Personal Project, Unreal Engine 2025

- Developed an intense action-packed FPS where players eliminate NPCs within time-limited levels.
- Designed enemy placement, spawn logic, and level layout to maximise player tension and replayability.

Deadly Witch | Personal Project, Unreal Engine 2025

- Created a third-person action game featuring melee and magic combat mechanics.

- Designed enemy AI behaviour, combat arenas, and player progression to deliver a challenging action experience.

SKILLS & SPECIALITIES

Game Engines: Unreal Engine (Primary) • Unity • Blender

Design Skills: Level Design • Gameplay Design • Environment Design • Narrative Design

Technical: Unreal Blueprints • C++ (Basic) • Game Testing • QA & Feedback

Soft Skills: Player Experience Analysis • Difficulty Balancing • Gameplay Flow • Creative Direction

Languages: English (Fluent) • Tamil (Native)
